

VPS is Focusing on PICU Quality Improvement

VPS is the Way to Truly Benchmark Your PICU's Performance as a Fundamental Requirement for Quality Improvement

What is VPS Doing?

VPS is launching several QI initiatives in 2023. Your PICU team has the opportunity to collaborate with other PICU teams to improve care in your PICU.

VPS QI initiatives are open to all participating VPS members.

Want to Operationalize QI in Your PICU?

Let VPS help you put a plan into action. There are several options:

- 1) New and custom collaborative QI projects.
The Nutrition Collaborative was the first to launch (and has 14 participating PICUs). Results are currently being analyzed with data collected since October 2019.
- 2) A series of VPS QI Workshops have launched (20 PICUs have already signed up). Activities include:
 - Learning QI Methodologies
 - Applying QI Using VPS Data
 - Interpreting and Analyzing QI Data
 - Practical Aspects of Implementing QI Projects
- 3) Educational opportunities on the basic tools and definitions of quality improvement including the steps required for the QI process and the tools used for pursuing QI initiatives.

Join us as we bring together teams of PICU colleagues desiring to collaborate by impacting the topics that are of the most interest to your PICU team.

Collectively, we can make significant improvements in clinical processes and patient outcomes in your PICU.

DOES YOUR PICU PERFORM QI?

VPS IS OFFERING:

➤ COLLABORATIVE QI PROJECTS

➤ QI WORKSHOPS

➤ QI TRAINING

VIRTUAL PEDIATRIC SYSTEMS
